# Icon. At the forefront of intracranial care.

Leksell Gamma Knife® Icon™ provides clinically proven, unmatched precision with 2x–4x better sparing of normal brain tissue. With Icon you can treat virtually any target—including highly complex benign, malignant and functional lesions. You can also choose from frame-based or frameless immobilization, and single-session or fractionated treatments. Icon options plus Gamma Knife precision gives you the flexibility to treat more patients, more efficiently.

## Welcome message

### THE 2019 CONGRESS PRESIDENT'S MESSAGE

Thank you for joining us for our 14<sup>th</sup> ISRS biannual meeting, which promises to be a milestone for our society. Since the 13<sup>th</sup> meeting in Montreux, our society has quadrupled in size to over 800 members and is growing by the day. This has been in response to greater than ever society activity, combined with the joining of local societies in affiliated membership to the ISRS.

For those who are joining us for the first time, welcome to our society and congress. You will find we are an all-embracing, multi-disciplinary society that accepts our differences and appreciates that these differences allow us to learn from each other. It would be a sterile and stale environment if radiosurgery was dominated by just one discipline and one platform, with little to discuss and learn. I strongly believe that it has been the cross-fertilisation of ideas from Neurosurgery, Radiation Oncology and Medical Physics working together that has moved our discipline forward, and will continue to do so. We hope that you enjoy our scientific program with over 300 presentations featuring outstanding invited speakers from a wide range of specialities. We invite you to participate in the carefully organised social program; promising to take advantage of the astonishing beauty and vibrancy of Rio.

**Ian Paddick**  
President of the ISRS

### THE 2019 CONGRESS CHAIRMAN'S MESSAGE

« Bringing Medical Specialties Together under the Radiosurgery Umbrella »

As Radiosurgery once revolutionized the medical world of Neurosurgery and Radiation Oncology, it now marches to integrate Surgical Oncology and Medical Oncology specialists under the same umbrella. Be tuned for an enticing scientific program and the unmatched beauty of a major metropolis punctuated by mountains, jungles, ocean and native friendly people representing cross-cultural groups from all corners of the world. They have chosen this paradisiac site to live and receive visitors to participate with their joyful way of living. Prepare to enjoy Rio living and Radiosurgery Science on June 9-13, 2019.

## The ISRS society

### ABOUT THE ISRS

The International Stereotactic Radiosurgery Society (ISRS) was founded as a worldwide non-profit organization in 1991 and remains the leading professional body of its kind.

Created to foster learning and research on the topics of brain and body radiosurgery, the society is dedicated to:

- Promoting technical developments in stereotactic radiosurgery
- Promoting the highest levels of clinical expertise
- Convening every two years at the ISRS Congress

### MEMBERS' PROFILES

The ISRS encourages interaction amongst a diverse international community of neurosurgeons, radiation oncologists, medical physicists and other healthcare professionals dedicated to the advancement of stereotactic radiosurgery.

The current membership of the society has an increasingly international flavour and is composed of over 800 specialists from all continents. Membership of the ISRS can be either individual or through affiliated Societies, which are currently represented by the Argentinean Radiosurgery Society (AAR), the Brazilian Society of Radiosurgery (SBRC), the Latvian Therapeutic Radiology Association (LTRA), and the Russian Radiosurgery and Stereotactic Radiotherapy Society (RSRS).

### ISRS OFFICIAL JOURNAL

The ISRS and Samuel Ryu as Editor in chief has launched the Journal of Radiosurgery & SBRT (Stereotactic Body Radiation Therapy), which is intended to foster learning and research in the rapidly emerging area of radiosurgery/SBRT for the brain and body sites.

### ISRS EDUCATIONAL PROGRAM

#### ISRS WEBINAR LECTURES

Featuring key international experts on the field of radiosurgery and oncology highlighting current practice and future directions of extra- and intra-cranial SRS/SBRT, the ISRS held its 50th webinar in December 2018.

The upcoming webinar schedule can be seen on the following page: [www.isrsy.org/public/en/courses/webinars/upcoming-webinars](http://www.isrsy.org/public/en/courses/webinars/upcoming-webinars)

Previous webinars are available for replay for ISRS members

#### ISRS EDUCATIONAL COURSES

From December 2016, ISRS has implemented a program of Educational Courses, which are dedicated to various applications of SRS/SRT for management of brain and body diseases. The events are organized 6 times per year in different countries worldwide. For more information on forthcoming Courses, please visit our web-site: [www.isrsy.org/public/en/courses/training/forthcoming](http://www.isrsy.org/public/en/courses/training/forthcoming)

The society will also offer to endorse meetings and courses that are consistent with its values or set up a partnership with other societies or organizations in order to create joint courses.

### ISRS GUIDELINES PROJECT

This project employs a mentorship strategy to develop the next generation of leaders in radiosurgery as each project lead is matched with a senior academician.

Our main objective is to provide standards for all SRS treatments, in order to globally support the safe practice of radiosurgery.

The first phase of the ISRS guideline project is now completed. The next set of guidelines have been scheduled and are under preparation.

### ISRS RESEARCH ACTIVITIES

The ISRS Working Group on Prostate Radiosurgery was created in November 2018. For more information about its activities, please, visit our web-site: [www.isrsy.org/public/en/radiosurgery/isrs-working-groups](http://www.isrsy.org/public/en/radiosurgery/isrs-working-groups)

### JOIN US!

#### Ready to join us? Do you want to become a member, or are you already a member of the ISRS?

If you have not previously registered with the ISRS, it is quick and easy to set up.

Click on the «Become an ISRS member» button and follow the on-screen instructions ([www.isrsy.org/public/en/sign-in/](http://www.isrsy.org/public/en/sign-in/)).

Current members of the ISRS can renew their membership directly by paying their dues through the online payment system or by bank transfer.

Visit our website [www.isrsy.org](http://www.isrsy.org) and join our community on the social networks : Facebook, Twitter and LinkedIn.

# Sharpen your edge in radiosurgery...

**Edge Radiosurgery: Making radiosurgery an option for more patients.**

Deliver accurate radiosurgery treatments quickly and efficiently with the Edge® radiosurgery system. Edge's advanced technology enables you to offer powerful, non-invasive radiosurgery treatments anywhere in the body where radiation is indicated. Expand treatment options for patients and gain a competitive edge with the system as dedicated as you are.

Learn more about Edge Radiosurgery at [varian.com/Edge](http://varian.com/Edge)

**Attend the Varian Cutting-Edge Radiosurgery Symposium at ISRS 2019:  
June 10, 2019 at 17:00 – 18:30 in the El Pardo I room.**

Radiation treatments may cause side effects that can vary depending on the part of the body being treated. The most frequent ones are typically temporary and may include, but are not limited to, irritation to the respiratory, digestive, urinary or reproductive systems; fatigue, nausea, skin irritation, and hair loss. In some patients, they can be severe. Radiation treatment is not appropriate for all cancers. See [varian.com/use-and-safety](http://varian.com/use-and-safety) for more information.
